HEATING + COOLING

## WHY DO YOU NEED A SERVICE PLAN?

- ▶ **Increase energy efficiency.** Cooling and heating your home uses more energy than any other system in the home. By using a few inexpensive energy-efficient measures, we can help you reduce your energy bills.
- ▶ **Help prevent mechanical failure.** Regular maintenance allows us to catch the little things before they cause larger problems. This will not only save you money, but allow us to give you an accurate expectation on the remaining life of the system.
- ▶ **Improve comfort conditions.** Seasonal tune-ups allow us to ensure your heating and cooling system is running properly before extreme temperatures hit.
- ▶ **Maintain your warranties.** A system's manufacturer warranty is typically void if the system has not been inspected at least once a year.

**WATSON**  
HEATING + COOLING

**We service all brands of HVAC equipment.**
